- Street price: \$10

## Stainless-steel disks last longer

Microplane has introduced stainless-steel sandpaper, available for 5-in. random-orbit sanders or ¼-sheet finishing sanders. We tested a medium-grit disk with a hook-and-loop backing on a random-orbit sander. It cut hardwood more aggressively but left a rougher surface than conventional 100-grit aluminum-oxide sandpaper. The disks come in three abrasives: coarse (40-60 grit), medium (100-120 grit), and fine (180-200 grit).
