Personal Care

In The  
Media

As seen in  
**Luxury Spa Finder**  
magazine, page 53 of the  
July/August 2007 issue.

The **Microplane Foot File** (US\$22, [www.microplane.com](http://www.microplane.com)) wasn't born in the spa, but it may soon find its way there. The company started with furniture sanders, moved on to cheese graters, and is now taking aim at rough feet. It's perfectly gentle (unless you drag your knuckles across it) yet incredibly effective at removing dry skin—the evidence collects in the back of the paddle.
